Professional Experience

Fint

React Native Developer

Build entire gold section using rest apis , where I do use redux ,axios , haptic and a variety of packages & systems to continue the flow of buy & sell gold in real-time with very low latency.

Diet & Care

React Native Developer

Build complex UI and use sensor-based technologies to enhance live tracking of steps & present it in a very clean fashion. Also the app has very low latency in tracking the measurements and generating data on how many calories or Kcal are burned to the end user.

Horekaa

Full Stack

Restaurant management platform worked heavily on node & express side to enhance dynamic URL, options to engage specifically with each & every restaurant & ability to modify the data .

Beingsanatan.in

Full Stack

It's a complete e-commerce that sells merchandise implements an entire OTP verification system,forgot password, change password ,Razorpay for payment, add to cart functionality and many other things using entire mern stack

Web Chat app

Full stack

Implemented web sockets for enhancing the logic to interact between two users with an entire authentication system.

Astralshops.in

Php developer

My passion project which I started in class 10 an e-commerce website to serve foods & other things eventually shut down due to studies

Decorous

Full stack

An event-based company currently building this one requires a lot of stuff like chat features,admin ,super admin & many complex things

Search anything from the Website

Generative Ai Engineer

It's a passion project deployed on hugging face through which any user can paste the website URL and ask anything about the website related to it & The chatbot will answer everything

Award Search

Generative ai engineer

Used langchain to build this award-searching hugging face space where you can search specific famous personalities and it will list all awards of his life

Pdf QnA chatbot

Generative ai engineer

It's a Google Collab project where I used concepts like tokens, chunking embeddings, and a lot of complex topics. Here you can upload a pdf and ask any specific question to it and it will answer it.
